

Active Contact

Holding Sex Offenders Accountable

Benefits:

- Saves significant time and resources in tracking and managing sex offender verification, registration, and re-registration cycles
- Configurable to each state's specific classification requirements
- Automated and consistent messaging to use with every type of offender reminder
- Helps to increase compliance rates
- Single point of communication to support effective, efficient means of tracking pertinent information on the offender

Features:

- Automated reminder notifications to offenders triggered by pre-defined parameters (ie., offender classification level)
- Standard templates for e-mail and scripting messages for phone calls provided
- Activity reports on completed calls, disconnected calls, completed e-mails, and non-deliverable emails
- Integration of information with OffenderWatch® data collection tool

Active Contact allows law enforcement agencies to send notifications to registered sex offenders based on the classification level of requirements for re-registration and other purposes. Agencies can save valuable resources and time by using this tool to:

- Schedule an automated communication delivery by phone and/or e-mail to sex offenders due for a registration or re-registration
- Send a failure-to-comply notice
- Manage other communications, such as state and federal mandates offenders must obey or risk felony charges

At every turn – Active Contact delivers:

- Significant time savings by eliminating paper pushing and phone calling – the system does it all for you

- Sends a strong message to the offenders that they are being watched

- Supports increased compliance

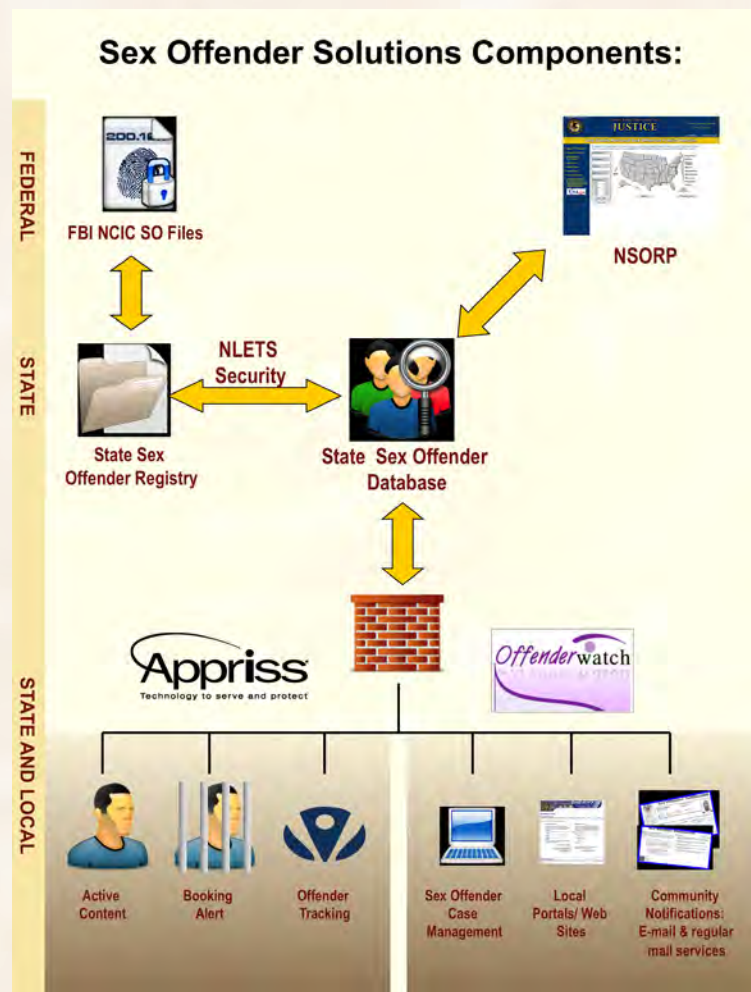

Active Contact is part of our suite of comprehensive service offerings to address sex offender management. It is designed to support goals and objectives of the federal, state and local level agency requirements for sex offender management.

Service Offerings:
