Nebraska to offer electronic collision reports online

The State of Nebraska is unveiling a new service to make it easier for motorists to obtain copies of vehicle collision reports. Collision reports submitted by local police departments, sheriffs' departments and state police are now available on BuyCrash.com for immediate printing 24/7 through a secure Internet connection.

To obtain a copy of a collision report, individuals can access BuyCrash.com, enter a few simple pieces of information, such as last name and date of collision, and locate their report.

By accessing BuyCrash.com individuals can locate, view and purchase copies of vehicle collision reports from the comfort of their own homes or offices without the hassle of travelling to the Department of Roads in Lincoln and waiting in line for a copy. In cases where parties involved in an accident are injured or when motorists are from out-of-state, purchasing a collision report online is a great convenience.

“We’re excited about providing this service to the citizens of Nebraska,” said John Jacobsen Deputy Director of Operations for the Nebraska Department of Roads. “BuyCrash.com is a revolutionary approach to making collision reports available to the public online.”

In addition to Nebraska, collision reports in Georgia, Indiana and Kentucky are available at BuyCrash.com.

About OPS

OPS is a comprehensive, end-to-end provider of data management products and services. It provides government and private-industry clients with Modifiable Off-The-Shelf (MOTS) products to meet their unique business needs, as well as custom software development, hosted solutions, an integrated customer service/technical support help desk and expert project management resources.

OPS is a division of Appriss. Appriss provides innovative technology solutions that serve and inform communities throughout the United States. Services include an automated victim notification service, a real-time data network of incarcerated persons, and a national electronic tracking system used by tens of thousands of pharmacies and law enforcement investigators to prevent the illegal sale of over-the-counter cold medicine containing pseudoephedrine. Through OPS, Appriss offers solutions that provide government agencies with innovative ways to manage and provide access to public information.
