

**OffenderWatch®**  
*Data Collection Tool*

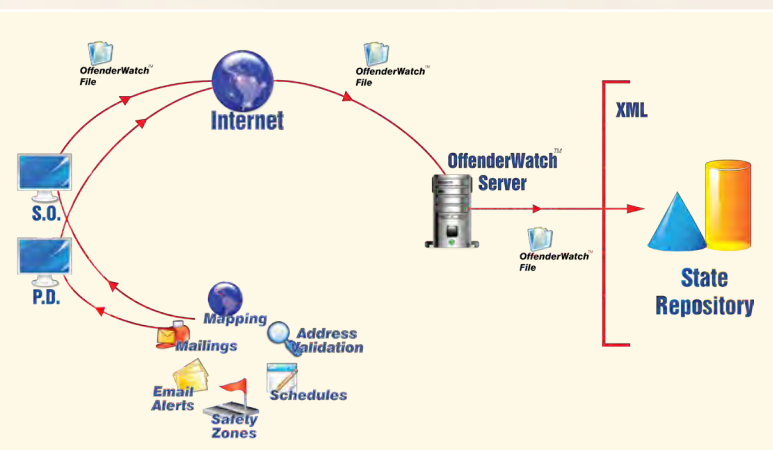

OffenderWatch® provides a Web-based database of your offenders — all searchable, mappable, exportable, and printable. As offenders move from one jurisdiction to another, data can be imported automatically. The tool manages the address verification/compliance check cycle and places offenders on a calendar, based on their individual verification cycles, with an automatic reminder system. The address verification feature allows the capture of a proper address while the offender is present, and provides immediate notification of residency exclusion, or buffer zones.

## Benefits:

- Commercial-off-the-shelf (COTS) application to address all the functions required for sex offender management, including registration, verification, and notification
- Easy to use, runs on any PC with Internet access
- Configurable design to evolve with current and ongoing sex offender management requirements
- Pinpoint accuracy of locations
- Easily accessible offender reporting
- Eliminates tedious paperwork, calls, e-mails and ongoing manual tracking for the registration and re-registration management cycles
- Provides a safeguard for compliancy with applicable residency restrictions laws
- Accurate, near real-time data available; eliminates any duplicate entry of data
- Secure data and backup processes

## Features:

- Web-based data collection tool houses all data associated with offenders, including:
  - » Demographics
  - » Offenses
  - » Addresses
  - » Photo
  - » Other data as required by federal, state, local requirements
- Mapping and verification capabilities
- Exports and prints offender data
- Manages the address verification/compliance check cycle and provides automated reminders
- Automatically manages “safety buffers” and residency restrictions around schools, child care centers, bus stops, or other places where children gather
- Allows for data synchronization between the state’s repository and the application
- All data hosted in a secure CJIS-compliant facility

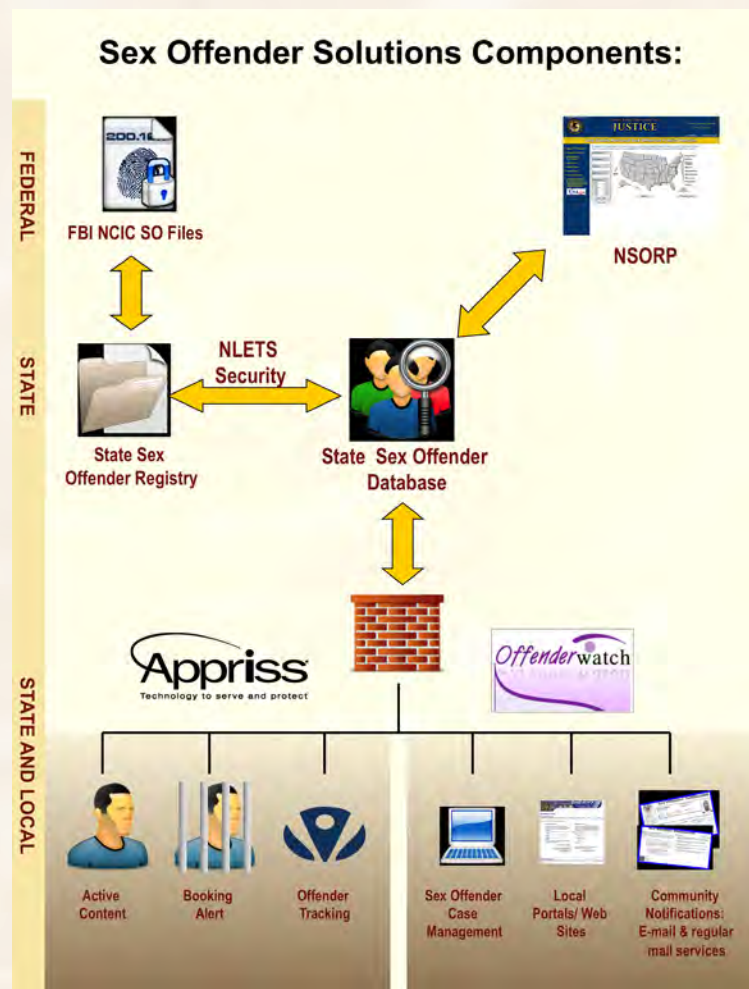

**OffenderWatch** is part of our suite of comprehensive service offerings to address sex offender management. It is designed to support goals and objectives of the federal, state and local level agency requirements for sex offender management.

### Service Offerings:

- OffenderWatch® data collection tool
