

Cerner Integrates NARxCHECK™ Into Electronic Health Record System

LOUISVILLE, Ky., July 2015 /GlobeNewswire/ -- Appriss Inc., a leading technology provider for risk assessment and analytics in public safety and health care, announced that Cerner (Nasdaq: CERN), a global leader in health care technology, has integrated NARxCHECK into its electronic health record (EHR) system in an effort to fight prescription drug abuse and diversion nationwide.

"We are pleased to announce the Cerner integration as the first national EHR integration of NARxCHECK," said Mike Davis, CEO of Appriss, Inc. "The epidemic of prescription abuse and diversion continues to grow. Providing actionable analytics of a patient's prescription history inside a physician's workflow could save lives."

NARxCHECK (<http://www.appriss.com/narxcheck.html>), is an analytics solution that provides near real-time insights directly in the EHR to assist clinicians in making better prescribing decisions for controlled substances. The program provides three key components for prescribers and dispensers: a patient score, an interactive graph detailing the prescribing patterns and detailed information about each prescription. An algorithm assesses and computes the history from a prescriptions-dispensed database, including statewide prescription drug monitoring programs (PDMP), to highlight potential abuse of narcotics, sedatives and stimulants.

Embedding NARxCHECK within the Cerner EHR gives prescribers near real-time access to PDMP data and provides transparency to states to monitor compliance. Cerner is the only EHR supplier to package this process with one simple deployment.

"Through the integration of NARxCHECK directly within the Cerner EHR, we are one step closer to breaking down interoperability barriers across health care," said Bob Robke, vice president of interoperability at Cerner. "Providers will now have access to powerful PDMP data in seconds, a task that until now has added time and complexity to their workflow."

About Appriss

Appriss provides data-driven solutions to fulfill our mission of keeping communities safe and informed. Partnering with public safety, healthcare, and leading private and public companies, Appriss delivers solutions that prevent fraud, mitigate risk, fight crime, ensure compliance, increase public safety and save lives. Appriss' solutions are always backed by excellent customer support with technical agents in the U.S. that are available to help 24x7x365.
